

Subject: Year 8 Technology 2019 Revision guidance

For the Summer Assessment Mark, pupils are assessed on their project **written coursework, manufacturing skills and a written examination paper**. The following details what written assessment work is to be submitted. This work has been carried out in class and for homework throughout the term. It relates to the Lapel Badge project.

I HAVE:

Written a problem Identification

Completed a detailed Specification

Carried out research giving my own conclusions on findings

Presented different Design Ideas, sketched and written about. One Idea chosen, giving reasons why.

A Working Drawing of the final Design

Tested the Design, and written an Evaluation (completed at end of project)

The written examination will cover all theory taught this year as detailed in the **class booklets**. The following areas will be covered:

Safety

Mobile phone holder design, including the Design Process and Plastics theory

Structures, including Forces

Lapel Badge designs, including Plastics theory, and Electronics.

Pupils should refer to the first page of the booklets which detail learning intentions.

The summer Assessment Mark will be made up of 50% Continual Assessment (Written Coursework and Manufacturing of the Lapel Badge) and 50% Examination.

Any pupil who has not completed all parts of the Technology booklets, perhaps due to an absence, should speak with the class teacher as soon as possible.
