

REVISION CHECKLIST FOR YEAR 10 GEOGRAPHY

The following are the topics that will be covered in your Year 10 exam including a detailed list of what you will be expected to do for each topic.

TOPIC 2: ECOSYSTEMS

Revise **ALL** of your Topic 2 Ecosystems booklet. You should be able to:-

1. define the term ecosystem
2. name and locate the world's hot deserts
3. describe the hot desert climate
4. describe how animals survive in the hot desert climate with specific reference to the camel
5. describe how plants survive in the hot desert
6. name and locate the world's tropical rainforests
7. describe the basic details for climate, soil, plants and animals in the rainforest and give examples of the links between them
8. list reasons for deforestation
9. suggest ways in which the climate, animals and soil of the rainforest suffer when deforestation occurs

TOPIC 3: EUROPE

Revise **ALL** of your Topic 3 Europe booklet. You should be able to:-

1. distinguish between Europe and the EU and briefly outline when and why the EU was set up
2. name the countries of the EU and locate them on a map
3. name the capital city of each EU country
4. state several key arguments why a country might wish to be part of the EU
5. state several key arguments against EU membership
6. outline some consequences of Brexit
7. define the term economic migration and describe such migration within the EU
8. identify the negative stereotypes that have caused the migrants to be treated with hostility, including in local places
9. provide counterarguments to these negative stereotypes
10. define the term refugee
11. name countries from which refugees are moving into Europe and state reasons why people are leaving these countries
12. describe the main migration routes into Southern Europe and how migrants are using these routes
13. outline what happens to refugees in the UK

TOPIC 4: NATURAL HAZARDS

Revise **ALL** of your Topic 4 Natural Hazards booklet. You should be able to:-

1. define the term natural hazard and list 5 such hazards
2. describe the earth's structure by defining the terms core, mantle and crust
3. define the term plate
4. state the relationship between plate boundaries and the occurrence of volcanoes and earthquakes
5. state why plates move and the directions of such movement
6. draw a labelled diagram explaining how earthquakes and volcanoes occur at converging plate margins
7. define the terms volcano and volcanic eruption
8. define the key terms associated with a volcano/volcanic eruption:- active, dormant, extinct, vent, crater, secondary vent, magma chamber, lava flow, volcanic bombs, steam and gas, ash cloud
9. give details for a volcanic eruption that had an effect on people, economies and the environment
10. state key facts about the 2011 Japanese earthquake
11. identify the media as playing a key role in raising public awareness of natural disasters
12. list the different types of media used
13. define the term bias
14. evaluate a media resource using a set of criteria

TOPIC 5: Global Citizens

Revise **only pages 3 to 9** of your Topic 5 Global Citizens booklet. You should be able to:-

1. state world population size
2. define the terms birth rate and death rate and describe how they vary between MEDCs and LEDCs
3. give reasons for variations in birth and death rates
4. explain how the balance between birth and death rates influences the size of a country's population
