The following is what you should be able to do for your Geography exam in November.

TOPIC 1: NATURAL HAZARDS

Revise ALL of your Topic 1 Natural Hazards booklet as follows.

1. Define the term natural hazard and list 5 such hazards.
2. Describe the earth's structure by defining the terms core, mantle and crust.
3. Define the term plate.
4. State the relationship between plate boundaries and the occurrence of volcanoes and earthquakes.
5. Sate why plates move and the directions of such movement.
6. Draw a labelled diagram explaining how earthquakes and volcanoes occur at converging plate margins.

7. Define the terms volcano and volcanic eruption.
8. Define the key terms associated with a volcano/volcanic eruption:- active, dormant, extinct, vent, crater, secondary vent, magma chamber, lava flow, volcanic bombs, steam and gas, ash cloud.

9. List different types of media.
10. Identify the media as playing a key role in raising public awareness of natural disasters.
11. State key criteria which could be used when evaluating information provided in the media.
12. Identify the different strategies used in a TV news broadcast.
13. Comment on media reports with reference to evaluation criteria & broadcasting strategies.

TOPIC 2: EUROPE

Revise your Topic 2 Europe booklet up to and including page 5 as follows.

1. Distinguish between Europe and the EU and briefly outline when and why the EU was set up.
2. Name the countries of the EU and locate them on a map.
3. Name the capital city of each EU country.
