

The following is what you should be able to do for your exam in November.

TOPIC 1 CLIMATE: You must revise fully ALL of your Topic 1 booklet.

- Define the term climate.
- Draw a climate graph when given appropriate data.
- Read key temperature and rainfall figures from a climate graph.

- Name and describe, using figures, the overall climate of the B.I.
- Describe the main differences in temperature and rainfall across the British Isles.
- State how each of the following will influence climate – latitude, altitude, prevailing winds, ocean currents, distance from the sea.
- Give the main reasons which explain the climate of the B.I., including the differences in temperature and rainfall.

TOPIC 2 ECOSYSTEMS: You should revise up to and including page 10 of your Topic 2 booklet.

- Define the term ecosystem.
- Name and locate the world's hot deserts.
- Describe the hot desert climate.
- Describe how animals survive in the hot desert climate, with specific reference to the camel.
- Describe how plants survive in the hot deserts.
